No, it was just a thought Via had and we have heard clearly that the community did not want that to occur. The idea was to consolidate land adjacent to the railroad to allow for parking, retail and housing development. They are now looking at different approaches to achieve the development without the street closure.

Thanks. In working on the Sound Transit D-M Street Connector there has been no mention of the requirement by S-T to close East C Street. They want to close East A Street and South C Street. Pretty soon we will not have a North-South route anywhere downtown. Is the idea of closing part of East C still under consideration? If so it will affect our discussions with S-T.

Best regards,

Would you please send me an electronic copy of the Tacoma Dome Area Plan that you are working on.

Thanks!!

Best regards,
